## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-30, and 80-81, 31-39 and 82, 46-49 and 65-69, drawn to a system for configuring a medical device, classified in class 705, subclass 02.
  - II. Claims 40-45, drawn to a method for outsourcing fabrication of a medical device by querying, classified in class 707, subclass 04.
  - III. Claims 50-64, 70-79 and 83-85, drawn to a computer program product or system for data collection classified in class 707, subclass 104.1.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility as a healthcare management system; and invention II has separate utility as a query formulation; invention III has separate utility as application of database or database structure. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and/or

Art Unit: 3626

because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).
